

ShakeSecret

Blind Box

Concept Art Revision Brief v2

For Lovart / AI Design Tool

Overview

- **Product:** ShakeSecret — Blind Box
- **Platform:** Mobile (iOS / Android), portrait-first
- **Art style:** Maintain the cream-tone + Pop Mart ugly-cute IP aesthetic from the original 4 pages. Keep the quality, warmth, rounded corners, ribbon/bow decorative elements.
- **Core mechanic:** Shake blind boxes, listen to the sound, and match what's inside to the correct box — simulating the real blind box shaking experience.
- **Changes from v1:** This brief supersedes the previous round. All changes are marked below.

Global Changes (All Pages)

1. **Brand name:** Main title "ShakeSecret", subtitle "Blind Box". Remove "PUFF & PALS" and "Collect · Care · Cherish"
2. **No level system:** Do not display Lv.XX or any progression numbers
3. **No virtual currency:** No diamonds, coins, or Daily Reward counters
4. **No rarity tiers among regulars:** All regular figures in a series have equal probability. Only two tiers exist: Regular and Hidden. Do NOT use heart/star rarity indicators for regular figures — show character name instead
5. **Overall tone:** Warm, cute, healing — unchanged

Page 1: Home (Redesigned Entry Page)

Layout (Minimalist)

[Settings icon]	<- Top-left, small gear, low visual weight
SHAKESECRET	<- Main title (3D embossed, cream+pink)
Blind Box	<- Subtitle (handwritten ribbon style)
+-----+ [Current theme featured character] "Vanilla Whisper" No.07 +-----+	<- Central hero card, 60% of page Shows character from currently selected theme <- Character NAME (not "LEGENDARY") <- Figure number
===== * START * =====	<- Primary CTA, large pink capsule button Most visually prominent element
+-----+ Collection Guide +-----+	<- Secondary CTA, ~2/3 size of START

Requirements

- **No bottom navigation bar** (remove HOME/COLLECTION/GARDEN/SHOP/EVENTS 5-tab bar entirely)
- **Only two entry points:** START (play) + Collection Guide (view collection)
- **START button must be the most visually prominent element on the page**

- Settings icon in top-left corner, small and unobtrusive
- Hero card shows the featured character from the player's current theme
- Character card displays: character illustration + character name (not rarity label like "LEGENDARY") + figure number

Page 2: Collection Wall (Restructured)

Layout

X			COLLECTION WALL			

[Tab1]	[Tab2]	[Tab3]	[Tab4]	[Tab5]		<- Series tabs
* COZY FRIENDS *			[eye]	<- Series name + preview icon on FAR RIGHT		
Snuggly buddies...				Click icon -> floating modal with full lineup preview (family photo)		
+-----+ +-----+ +-----+						
01	02	03				3-column grid (3 cols x 3 rows)
[fig]	[fig]	?				Collected = full illustration
Banana	Glacier					Show character NAME (not hearts/stars)
+-----+ +-----+ +-----+						Uncollected = gray + "?" + number
+-----+ +-----+ +-----+						
04	05	06				
?	[fig]	[fig]				
	Mint	Choco				
+-----+ +-----+ +-----+						
+-----+ +-----+ +-----+						
07	08	09				Position 9 = Hidden edition
[fig]	[fig]	* HID?				Gold border + silhouette + "?"
Berry	Cream	???				"HIDDEN" label
+-----+ +-----+ +-----+						
56% COMPLETE 5/9 [SHARE]						Progress bar

Requirements

1. Grid layout: 3 columns x 3 rows = 9 cells (8 regular + 1 hidden)
2. Preview icon (eye icon): placed at the far right of the series name. Clicking it opens a floating modal showing all characters in this series as small thumbnails (hidden = silhouette only)
3. Hidden edition: Fixed at position 9 (bottom-right cell). Display as: gold border + character silhouette + "?" + "HIDDEN" small label. Add a note near the series title: "This series contains a Hidden Edition!"
4. No heart/star rarity markers — all regular figures have equal probability, so show character name instead
5. Three cell states:
 - Collected: full color illustration + character name + figure number
 - Uncollected: gray cell + large "?" + figure number
 - Hidden (untriggered): gold border + silhouette + "?" + "HIDDEN" label
6. Clicking "?" cell enters gameplay level for that character (guaranteed to contain that target; distractors are random from same series; hidden edition can randomly appear)

Page 3: Core Gameplay (Major Redesign)

This is the most changed page. The interaction model is completely restructured.

Layout

```
+-----+
|
| find: [silhouette ?] (0/1) | <- Target area
|
| +---+ ===== +---+ | 3 boxes in carousel
| | ? | || ? || | ? | | ALL IDENTICAL appearance
| |BOX| || BOX || |BOX| | Center box = LARGER + elevated
| +---+ ===== +---+ | Side boxes = smaller + slightly dimmed
| | [mini avatar] | | Bound avatar appears ABOVE center box
| | +-----+ | | (swipe left/right to switch selected box)
| | | Your pick | | Small tag below center box
| | +-----+ | | Communicates "CONFIRM = buying THIS box"
|
| --- Match -> --- | Instruction line (NOT "Which box is it?")
|
| [SHAKE icon] x7 | SHAKE: custom icon button ABOVE candidates
| | Remaining shake count in plain number
| +-----+ +-----+ +-----+ | Candidate avatars (3 in a row)
| | av1 | | av2 | | av3 | | Click -> binds to currently selected box
| |Banana| |Mint | |Berry | | Show character NAME below each avatar
| +-----+ +-----+ +-----+ | tap to match
|
| =====+
| | Take this one | Full-width bottom bar button
| +-----+ +-----+ | Gray/disabled until all 3 boxes matched
+-----+
```

Target Area (Top)

- Normal state: 1 target shown as a character silhouette + "?" + counter (0/1)
- When hidden edition is triggered: 2 targets displayed side by side:
 - First: regular target silhouette + "?"
 - Second: hidden target shown as star silhouette + "?" (matching the collection wall hidden style)
 - Do NOT use large "HIDDEN EDITION" banner text — use silhouette differentiation only
- Counter (0/1) tracks whether the primary target was found

Blind Box Area (CRITICAL CHANGE)

- 3 blind boxes, ALL IDENTICAL in appearance — same color, same shape, same size template, same "?" pattern, same "mystery BOX" text
- Do NOT color-code the boxes (no purple/green/pink/yellow/blue differentiation like the original)
- Boxes should be uniform cream/off-white with a simple "?" and gift-box pattern
- Carousel layout with visual focus:
 - Center box: visually 15-20% larger than side boxes + slightly elevated (soft shadow) + slight glow/spotlight
 - Left/right boxes: smaller + slightly dimmed (opacity ~0.6-0.7)
 - User can swipe left/right or tap side boxes to switch the focused box

"Your Pick" Visual Language (IMPORTANT)

- The center/focused box = the box the player is currently considering buying. When CONFIRM is tapped, this is the box the player "takes home"
- Add a subtle visual indicator on/near the center box that communicates "this is the one you're picking" — suggestions:

- A small shopping bag icon, tag icon, or gift tag hanging from the center box
- A small label below the center box saying "Your pick" or "Pick this" in a rounded tag shape
- A subtle highlight/glow ring around the center box (warmer/brighter than side boxes)
- When the player swipes to a different box, this indicator moves with the new center box
- GOAL: make it visually obvious that CONFIRM = buying the center box, not all 3 boxes

"Match" Instruction Line

- Replace the original "Which box is it?" — it sounds too childish/preschool
- Use a concise matching instruction like "Match" with a small arrow pointing down toward the candidate area
- This tells the player: "tap a character below, then it gets matched to the focused box"
- Keep it minimal — 1-2 words + an arrow icon

SHAKE Button (Custom Icon, Above Candidates)

- Position: Above the candidate avatar row, not below it
- Style: A custom-shaped icon button (not a plain text button) — suggest a shaking bell or shaking bottle silhouette shape
- Format: [icon] SHAKE x7 — remaining shake count shown as plain number (NOT heart shapes)
- Default: 3 boxes / 10 shake attempts per level
- Each tap: -1 count, plays audio + vibration + animation for the currently focused box only
- When count reaches 0: button grays out

Candidate Avatar Area

- Shows all possible characters in this round (typically 3, matching the 3 boxes)
- Each candidate: round-cornered card with character avatar + character name below
- Interaction: Tap a candidate -> it binds to the currently focused box (mini avatar appears above that box)
- Player can re-tap to change binding at any time
- Below the candidate row: small hint text "tap to match"

CONFIRM Button (Full-Width Bottom Bar)

- Position: Full-width bar at the very bottom of the screen
- Default state: Grayed out / disabled
- Active state: When all 3 boxes have been matched with candidates -> button lights up (color fill + subtle pulse)
- Optional disabled-state text: "3 matches to confirm"
- Tap CONFIRM -> the player "buys" the center box -> result page shows what was inside that center box only
- The CONFIRM button text could reinforce the purchase metaphor: "Take this one" or "Open" (rather than generic "CONFIRM")

Page 4: Result Popup (Real Blind Box Purchase)

Core Concept Change

Original: All 4 boxes opened with marks + Mastermind reveal = information overload
New: Simulate real blind box purchase — you picked 1 out of 3, you only see what you took home

Layout

X

[Selected character]

"Banana" No.03

NEW!

(If target hit - celebration)

* You found it! *

(If hidden hit - golden ritual)

Hidden Edition Unlocked!

"So rare! X% of players!"

* Added to your collection! *

[fig] [fig] [fig] [?]

NEW!

Continue / Play Again

Only show the ONE box player chose

Character name + number

"NEW!" tag (if new character)
OR "Already Owned" (if duplicate)

Celebration animation + confetti

Gold-themed large card

Scarcity indicator

Mini collection progress strip

NEW! tag on newly acquired

Full-width bottom button

Result Scenarios & Button Behavior

Scenario	Popup Shows	Continue Goes To	Play Again
Got new character	Character card + "NEW!"	Home	Replay this level
Got duplicate	Character card + "Already Owned"	Home	Replay this level
Hit target	Celebration + "You found it!"	This theme's Collection Wall (pick next "?")	-
Hit hidden	Gold ritual card + "Hidden Edition Unlocked!" + rarity %	This theme's Collection Wall	-

Requirements

- Only show 1 box result — the one the player chose via CONFIRM. The other 2 boxes remain

unopened and unshown

- No Mastermind-style marks (no comparison needed since only 1 result is shown)
- Emotion focused on a single point: joy (new/hidden) or mild disappointment (duplicate/missed)
- Target hit: celebration animation (confetti, glow, "You found it!" text)
- Hidden hit: gold-themed ritual card, emphasize scarcity ("So rare! X% of players have this!")
- Duplicate: show character with "Already Owned" in muted style, then let player Continue or retry
- Bottom: single full-width button (text changes based on scenario)
- Mini collection progress strip at bottom (shows collection state with NEW! tag on newly acquired)

Design Specifications Summary

Dimension	Requirement
Color palette	Cream white (#FFF8F0) + soft pink (#FFD4E5) + light gold (#F5E6D3) + warm brown (#8B7355) — unchanged
Border radius	Large (16-24px) throughout, capsule buttons (full round), medium cards (12px)
Typography	Title: 3D embossed effect; body: handwritten or rounded sans-serif
Decorative elements	Ribbons, bows, star sparkles, gift-box wrapping feel — unchanged
IP style	Pop Mart ugly-cute: big head, small body, round lines, innocent expression, soft colors
Blind boxes	3 boxes, ALL IDENTICAL appearance (same color, shape, size, pattern) — center one visually larger
Rarity	No rarity tiers for regulars — show character NAME only. Only "Regular" vs "Hidden" distinction
Shake count	Plain number format (x7, x6...) — NOT heart/star shapes

Quick Reference: What Changed from v1

Element	Original (Lovart v1)	Revised (This Brief)
Brand name	PUFF & PALS / Collect Care Cherish	ShakeSecret / Blind Box
Home page tabs	5-tab bottom nav	No tabs — START + Collection only
Level display	Lv.24	Removed
Currency	Daily Reward x25 diamonds	Removed
Rarity indicators	Heart-shaped rarity stars	Removed — show character name
Featured card label	"LEGENDARY"	Character name
Collection grid	4x4 (16 cells)	3x3 (9 cells: 8 regular + 1 hidden)
Hidden position	Fixed at cell #11	Fixed at cell #9 (bottom-right)
Family photo preview	Not present	Eye icon at series name far right -> floating modal
Game: box count	5 boxes	3 boxes
Game: box colors	Purple/Green/Pink/Yellow/Blue	ALL IDENTICAL (cream/off-white)
Game: instruction	"Which box is it?"	"Match" (concise, not childish)
Game: shake button	Bottom, with heart icons	Custom icon ABOVE candidates, with x7 number
Game: confirm button	Side by side with SHAKE	Full-width bottom bar, "Take this one"
Game: box selection	Not specified	Carousel: center box enlarged, swipe to switch
Game: binding feedback	Not shown	Mini avatar above matched box
Game: purchase metaphor	Not shown	"Your pick" tag below center box = CONFIRM buys THIS one
Result: boxes shown	4 boxes opened + marks	Only 1 box (player's choice), no comparison
Result: format	Mastermind reveal	Real purchase experience: what did I take home?
